A
Prognostication,
in which you may
behold the state of
this yeare of our
Lord God.
1623.

Being the third from the
Leape yeare.

Made and set forth by
William Dade Gent.
Practioner in
Phisicke.

LONDON.
Printed for the Company
of Stationers,
1623.

A Prognostication

The begining and ending of
the Termes this present yeare
1623. with their
Returns.

Hilary Terme, beginneth on the 23. of January, and
doth end on the 12. of February, & hath 4. Returns.

- | | |
|-------------------------|-------------------------|
| 1. Octabis. Hillarie. } | { 3. Crasti. Purifica. |
| 2. Quind. Hillarie. } | { 4. Octabis. Purifica. |

Easter Terme, beginneth the 30. of Aprill, & endeth
the 26. of May, and hath 5. Returns.

- | | | |
|--------------------|---------------------|----------------------|
| 1. Quind. Pasch. } | { 3. Mense Pasch. } | { 4. Quinque; Pasch. |
| 2. Tres Pasch } | { 5. Crasti. Ascen. | |

Trinity Terme beginneth the 13. of June, and endeth
the 2. of July, and hath 4 Returns.

- | | |
|-------------------|-------------------|
| 1. Crast. Trin. } | { 3. Quind. Trin. |
| 2. Octab. Trin. } | { 4. Tres Trin. |

Michaelmas Terme begins the 9. of October, and
doth end the 28. of November, and hath 8. Returns.

- | | |
|------------------------|-------------------------|

Note also, that the Exchequer openeth
eight dayes before any Terme begin (ex-
cept Trinity Terme) in which it openeth
but fower dayes before.

A description of the foure
Quarters of the yeare,
And first of Winter:

☉. in ♍. 22. 24.

ORderly our *Brumall* and last Quarter
Astronomicall, vulgarly called Winter;
began the last yeare the Twelſe day of Decem-
ber, when the Sun entered into the first Degree
of the cold and earthly Signe *Capricorne*, ma-
king the shortest day and longest night; and
this Quarter doth last till the Tenth day of
March next following.

This Hyemall Solsticiall or Winter Quarter,
is naturally cold and moyſt, according to the
Phlegmatick Complection, and resembling old
age. It is a most vncomfortable time; and filleth
the Body full of raw and moyſt humours, it is
an enemy to nature, and a Foe to all liuing
Creatures; it cloſeth vp the powres of the
Earth, and robberh her of her beaurie.

The Diseases of this Quarter are cheifely
Sciatickes, *Melancholy*, sore eyes, paine
in

A Prognostication.

in the Back and Stomack, *Cathars*, ach in the Head and Ioynts, falling sicknes, greife of the Brest and sides, and such like.

The estate of the weather you may see in the daily disposition of each Moneth following.

Of the second Quarter of the yeare, *called the Spring.*

☉. in ♍. ☿. ♀.

THe Sun having made a full period in the twelue Signes of the *Zodiack*, returns into the Vernall Equinoctiall Signe *Aries*, a signe of the fierie triplicity, and the exaltation of *Sol*; at which time begins a new *Solar* yeare, together with our first Quarter Astronomicall, which this yeare falleth vpon the tenth day of *March*, and endeth vpon the thirteenth day of *June*.

This Vernall Quarter is of a hot and moyst temper, resembling childhood; It is the most holsome time of all the yeare, to remoue diseases of a long continuance, and to prevent & avoyd such as are likely to ensue, for such humours as doe oppresse the Body & overcome nature, are easily avoyded by Purging, Sweating, Bathing, Bloodletting, or such like; drinks
coole

Dade. 1623.

coole & small, are most convenient for the preservation of health.

The vsuall Sickneses of this Quarter, are Measels, small Poxe, Scabs, Lithargies, Plurifies, Flushings in the face, Agues and such like.

The third part of the yeare called
Summer.

☉. in ♋. ♏. ♏.

Summer the Third Quarter (but the second Astrological) doth begin the thirteenth day of *June*; at which time the declining Sun is mounted vnto the highest poynt of his Ascendant, being neereſt our Zenith or *Verticall* poynt, producing the dayes with vs vnto the longest, having his first ingresse into the first minute of *Cancer*, being run into his farthest Tropicall limits Northwards from the Equinoctiall; this Quarter endeth vpon the Thirteenth day of *September*.

The nature of this Quarter is hott and dry of the Cholerick Cōplexion resembling Manhood, it doth turne the humours of the Body from cold and moyſture, to heate and drinelle and disperſeth them abroad into each part of the ſame, and Mans digestion is more weake

A Prognostication.

then in colder times, by reason the heat is dispersed to the outward parts, forsaking the inward.

The Sickneses common to this Quarter are Blysters, paine in the Eares, Head and Back, Iandies, Pestilence, Feavers, and the like.

Of the fourth part of the yeare, called *Autumne, or Harvest.*

☉. in ♋. m. 7.

THe Sunne having finished the second Trygon of the Zodiack now in his reuolting Spheare, reenters the Autumnall Equinoctiall Signe Libra; making againe the dayes & nights of one length: This is our second Spring, and the Third Quarter of the yeare Astrologically; which taketh his beginning vpon the Thirtenth day of *September*, and endeth vpon the twelffe day of *December*.

The condition of this Season is to be cold and dry, of the Melancholy complexion, resembling old Age; It is in nature contrary to the Spring, for it is variable, and by the learned Phisitions termed the Mother or Nurse of deadly Sickneses: A most perilous season, for what hath been euill in the times before, by the corrupt

Dade. 1623.

rupt state of the yeare, or other accidents, the same will in this Quarter shew it selfe; therefore it is perilous for diseases, and great care ought to be taken in the ordering of our diet, Cloathing, and exercise, by reason of this Seasons variety.

The Diseases vsuall of this Quarter, are such which raigne in the Summer season, with Melancholy, Emrods, Fluxes of blood, sore Eyes, Melancholy, Splene, Falling Sicknesse, payne of the back and Kidnies, and such like, &c.

A briefe description how the Planets are
placed about the Earth in the Sky, for every
moneth after Sunne setting, or before his rising, by
which you may perceiue how they keepe their motion
day and night all the yeare. Moreover, the New, Full,
and Quarters of the Moone; with an Astro-
nomicall iudgement of the weather
for each day of the yeare. Also
Husbandly instruction for
each moneth of the
yeare.

Ianuary.
